Nervous Breakdowns May Run In Family

This is the second of three articles by Dr. Fishbein regarding nervous breakdowns.

Doctors recognize that heredity may play something to do with development of nervous breakdowns. In some families, members incline to break down rather early in life. Whether this has to do with some internal weakness of the physical structure, or whether it represents an intensified reaction of one or more members of the family on the others, is a matter for investigation in each instance.

It is known that certain forms of mental disease associated with a change in structure of the nervous system are passed on through families. Thus there may be a tendency to mental defect and also to that form of insanity called dementia praecox or schizophrenia. Chief causes of nervous breakdowns are to be sought in the environments of the person concerned. Sometimes the influences primarily involved have been operative during the childhood of the person concerned, and there are some who insist that they may date back even to prenatal life.

A record of an exceedingly difficult childhood or of severe malnutrition in the expectant mother may eventually show itself in nervous breakdown of the child. During childhood and early life, improper feeding and malnutrition may so injure the body structure as to reveal itself in serious disturbances later. Infectious diseases sometimes cause permanent damage to tissues. Chronic poisonings from various industrial poisons, alcohol, or narcotics yield cases of mental breakdown. Finally, there are the stresses and strains of a life in this time of extraordinary speed, and the psychic and social causes associated with living conditions at home and environment at work.

These psychic and social causes concern such questions as unsuitable education, both in home and in school, emotional upheavals brought about by domestic incompatibility, or oppression at work, and also the serious strains associated with sudden loss of money or position, deaths of those who are loved, and any other condition bringing about anxiety, discontent, and dissatisfaction.

NEXT: How business affects nervous breakdown.

A BOOK A DAY

Tours London Docks and Finds Romance

The docks and warehouses of a great seaport are superficially about as dreary and unattractive a region as you could find anywhere. It is an evidence of H. M. Tomlinson's surpassing skill as a writer that he is able to make such neighborhoods seem places of high romance and great beauty.

His newest book is "Below London Bridge" and in it he tells of his rambles along the dockside district of London. He takes us up and down mean streets, past grain elevators and cargo derricks and overhead cranes and huge windowless warehouses and all the other unlovely appurtenances of sea-borne freight—and, actually, imparts to the reader much of his own tireless enthusiasm for the region.

For the richest romance is that of the sea and London River has been an ocean port since the days of the Roman galleys, and echoes and scents of the past are to be found in all sorts of unlikely corners and byways.

Mr. Tomlinson knows just where to look for them; better yet, he has an uncanny skill at describing them, and at communicating the emotions which they give him. After all, he says, this place is the heart of England. London is primarily a seaport. This freight that moves constantly over her wharves—take it out, and England would swiftly and inevitably dwindle. To understand England, and know how the country lives and what makes

it great, visit the docks. The book includes 48 full-page photographs by the author's son, H. Charles Tomlinson. Published by Harpers, the book sells for \$2.50.

YOUR CHILDREN

By Olive Roberts Barton

Mother's Voice Shows Her Strength of Will or Betrays Timidity

Much has been written about beautiful voices. To me there is no beauty in a voice that has no presence or force behind it. This does not mean volume, far from it, because bellowing ever lacked authority. An almost empty bottle gurgles loudest when pouring its contents. A futile person resorts to roars.

Once a mother asked me how to control her children. She wrote: "The more I talk the worse they get." I took it for granted that she also yelled. "Try," I suggested, "either utter silence or a very low, quiet tone, but in either case let your orders be felt. Don't take the attitude that you aren't sure they will obey. Show them you expect them to obey—that you know they will." Weeks later she replied (something unusual, by the way, when advice has been asked and answered) that she had never realized in her life before the miracle of a quiet word.

Timidity Is Futile A friend of mine has this experience: A neighbor comes in periodically, helplessly urging her to go over and see if she can do anything with Buddy.

"Buddy's mother," says my friend, "is one of those people not born to control. She is soft and sweet and easy and puts her own personality behind that of anyone near her. She does S. A. some with Buddy. He's only five, but he recognizes his mother's fear of him."

In this case the low voice is as futile as wind. There must be that undefinable something behind it that commands respect.

The mother who whines her words—and this becomes an easy habit—gets nowhere. Or she who wheedles and coaxes. Also the gentle lady who says, "Please, darling, do it for my sake."

A Wrong Approach For our sake! Show me the normal youngster who feels just so sorry or so grateful or so loving that he's going to put the lid on the caramel box for anybody's sake. I believe the latter to be about the weakest plea on earth. Authority of the right sort does not waver with love or kill right filial regard. Respect is a component part of affection. The child expects it, and regards with relief the person to be answered to. Unders, of course, that person proves too unreasoning and habitually dictatorial.

In any case, he instinctively obeys the voice that says firmly, "do it." "When you say that, smile!" suggested the Virginian. A grand idea. Like the quiet voice, a smile also contains certain magic. It may even shock the children into line from sheer surprise sometimes.

Sweet Home Mrs. Horace Fye spent a pleasant visit Thursday in the home of Mr. and Mrs. Roy Lee Bonds.

Mrs. Tom McCormick of Oklahoma spent a few days here with her parents, Mr. and Mrs. J. A. Huskey the past week.

Mr. and Mrs. H. H. Huskey have returned after a pleasant week and visit to Kilgore, Texas.

Mr. and Mrs. Wortham and Miss Eva Mae Brown of Prescott were visiting Mrs. Wortham's parents, Mr. and Mrs. S. A. Sewell, here Sunday.

Mr. and Mrs. Dutch McCain and Mr. and Mrs. Sid Johnson called on the family of Mr. and Mrs. Will McCain Sunday.

Mr. and Mrs. Coy Huskey and son, visited her parents, Mr. and Mrs. Ed Schovanover Sunday.

Mr. and Mrs. Roy Biggers spent Sunday with her sister, Mrs. Una King and Mr. King.

Mrs. J. A. Huskey has returned after several days stay in Prescott with her daughter, Mrs. Robert Frachy.

Mrs. M. H. Montgomery, Mrs. Oscar Montgomery, Mrs. Roy Biggers and Mrs. Star Mason were visiting and shopping in Prescott Monday.

More than 25,000,000 barrels of oil are used annually in this country for domestic and industrial heating purposes.

Easter Parade

The DARK BLOND

By CARLETON KENDRAKE

© 1935 NEA SERVICE, INC.

BEGIN HERE TODAY

MILICENT GRAYES, secretary to GEORGE DRINGOLD, finds her employer in his office dead. JARVIS HAPP, a stranger, offers to help her. He sends her to a beauty shop where she is transformed into a brunette, then takes her home, introducing her as his secretary. She meets HARRY's son, NORMAN, his stepson, ROBERT CALDER, MRS. HARRY and VERA DUCHENE, Mrs. HARRY's maid.

That night a note under her door informs Millicent, "The woman in black came to see me. Millicent sees the woman, tries to follow, but loses her. Millicent goes to the chauffeur's quarters. The chauffeur is dead from a bullet wound.

Next morning SERGEANT MAHONEY takes charge of the case.

Over the telephone Mrs. HARRY informs that her husband has been killed. She is warned not to inform the police.

Millicent tells Norman all she knows of what has happened. They locate the store where the woman in black came to see her. The woman is found in the chauffeur's room was sold, learn the purchaser was a woman in a black coat. Norman traces the license number of the car Millicent saw the woman in black driving.

NOW GO ON WITH THE STORY

CHAPTER XXXII

MILICENT, despite her excitement, remembered to check Norman HARRY's impulsiveness with a warning. "Don't call the name out loud," she said.

Norman HARRY, covering the distance which separated him from the car, laughed reassuringly. "Don't worry," he said. "I'm not entirely a fool."

"Oh, I didn't mean that."

"No offense," he told her, laughing good-naturedly. "I know you didn't. I just wanted you to see what precautions I took."

He unfolded a piece of paper on which he had scribbled: "Phyllis Faulconer, 3239 Baronne avenue."

Millicent's face showed her disappointment, as she read the memorandum. "Oh," she said, "I thought it would be."

"Thought it would be Vera Duchene?" he asked, as her voice faded into disappointed silence. She nodded.

"I don't know anything about detective business," he said, "but I understand detectives have to be careful not to jump at conclusions and then try to make the facts fit the conclusions. A good detective is one who goes ahead and gets the facts regardless of what they may be, and then draws conclusions from the facts."

"That may be the way a good detective does it, but it stands to reason it must have been Vera Duchene who was mixed up in this thing from the beginning."

"Not necessarily."

"Certainly," she told him, "it couldn't be this Phyllis Faulconer. Why, none of us even know her."

"And none of us," he pointed out, "know the woman in the black ermine."

HE hesitated for a moment, staring at her speculatively. "Is something the matter?" Millicent asked anxiously, becoming uneasy under his steady appraisal.

"They want you at the house."

"How do you know?"

"I telephoned."

"Oh, that's what took you so long."

"Yes."

"Whom did you talk with?"

"Sergeant Mahoney."

"Oh," she exclaimed, feeling suddenly cold with dread. "What does he want?"

"I don't know. He wouldn't tell me over the telephone. He said

Legion to Continue Use of "Comrade"

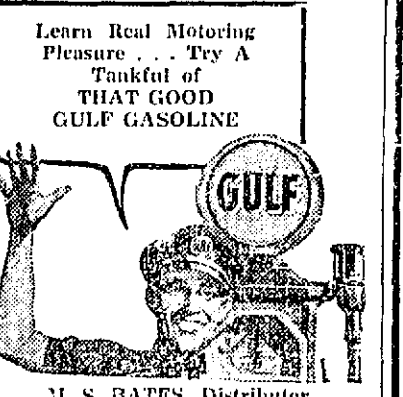

Refuses to Change to "Buddy" Because Reds Use Other Word

INDIANAPOLIS, Ind.—A movement to substitute the term "buddy" for "comrade" in the American Legion ritual, because the latter term is widely used by members of the Communist party and other radical groups is not receiving serious consideration at the Legion's national headquarters here.

With the Legion conducting an aggressive fight on Communism and other "isms" of alleged un-American tendencies, several posts throughout the country have urged that the term "comrade" be dropped.

Harper L. Chaffaux, national American Legion director and in active charge of the fight against radical organizations, is opposed to any change. He believes such a move might put the Legion on the defensive in its fight with Communism.

"The Communists might get us on the run and have us changing the term every week," he said Thursday night. "What is to prevent them from adopting any term we might select? Anyway, I think it is a lot of foolishness. We are more concerned with un-American and subversive influences seeking to undermine American ideals and traditions."

GLORIFYING YOURSELF

By Alicia Hart

Heat and Hats Are Hard On Hair

Steam heat and hats are two of the greatest enemies of healthy hair. If you doubt this, you have only to compare the scalp conditions of women who live in the country and go bareheaded a good deal of the time with those of city women who constantly wear hats and live in apartments where there is no moisture in the air.

Furthermore, drying machines are used too long for hair. Of course, for reasons of time and convenience, nearly everyone has to submit to them. But not after every shampoo. It's really an excellent idea to have your fingerwave dried by a gas or electric machine one week and by sunshine and air the next. Ask your operator to use plain water instead of wave-set lotion when she puts your waves in place. This way you'll have to spend less time under the dryer.

Try Hand-Drying If you have "mucous" instead of finger-waves, there's no need for you ever to have artificial heat on your shining locks. Insist on hand-drying. It doesn't take long and really is much better for your scalp. The same applies to women who wear their hair straight. If you have dandruff, better get a "cure" immediately and use it every night. It can be applied, you know, without disturbing any kind of wave. Simply dip your fingers in the liquid, place them flat against your scalp and massage, circular fashion, until the tonic is absorbed. Keep on until the soot of each and every hair has been loosened and stimulated. Meanwhile—and this applies particularly to persons with dandruff—be sure to wash and sterilize your hairbrush and combs each night before you go to bed.

brush and combs each night before you go to bed.

A Day in the Life of Nation's First Woman Horse-Trainer

Up at the crack of dawn for the morning workouts . . . Exercise boys get their instructions from Mary Hirsch.

Saddling . . . For the first time in the history of the American race track, a woman may formally officiate in the paddock.

On the track . . . Miss Hirsch leading the way to the starting barrier where the colts will be schooled in good manners.

Cooling out . . . With the practice run over, Miss Hirsch's charges are cooled out, and with their legs carefully bandaged, returned to their stalls.

"Careful now. Just a sip of water at the moment."

It must be an alibi for a poor performance. The colt displays his affection as Miss Hirsch considers his workout.

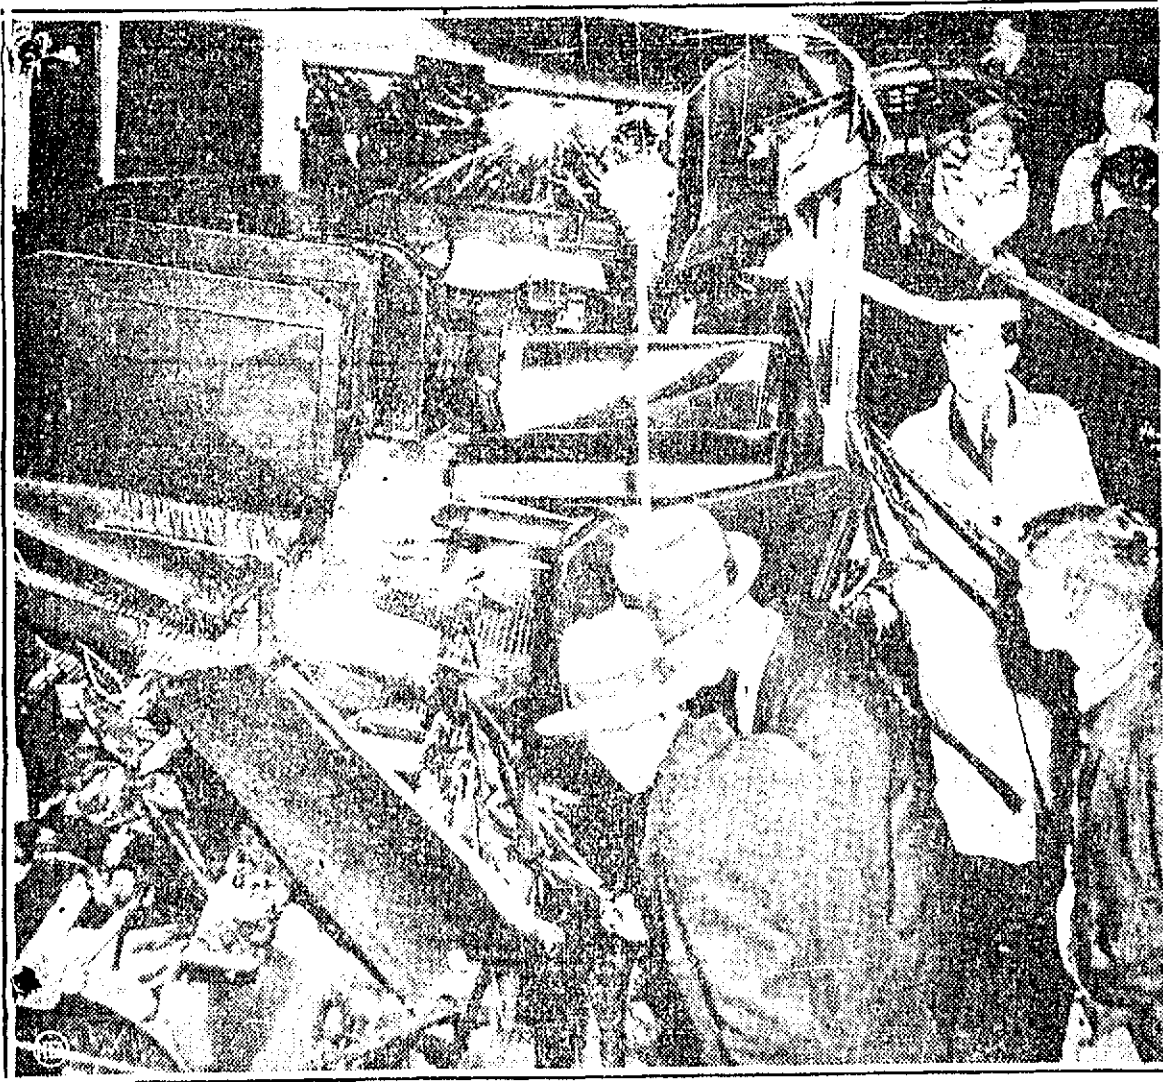

The laboratory . . . Where mixtures for all equine ailments are prepared under Miss Hirsch's direction.

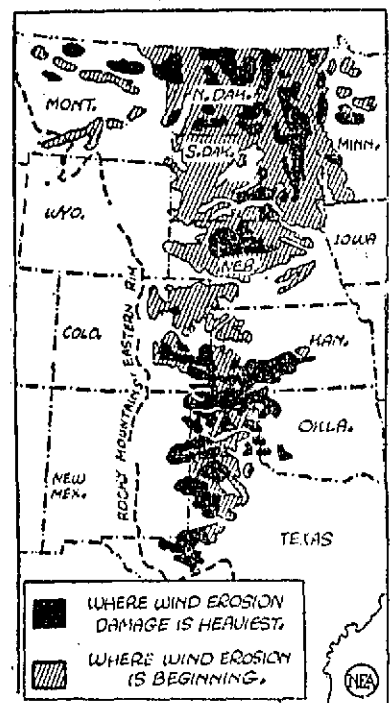

Evening . . . And out of the "working clothes" into a tasty dress . . . A good book, and relaxation.

Bus a Death Trap for Fourteen Children

How a nocturnal collision with a train at Rockville, Md., brought death to fourteen children who were passengers in the rear-end of a school bus, is revealed by this picture taken shortly after the accident. Note that, in contrast to the jumbled wreckage toward the back of the bus, some of the front seats are virtually intact. Eleven pupils and their teacher escaped injury. The driver was jailed on a charge of manslaughter.

Where Erosion Wreaks Havoc

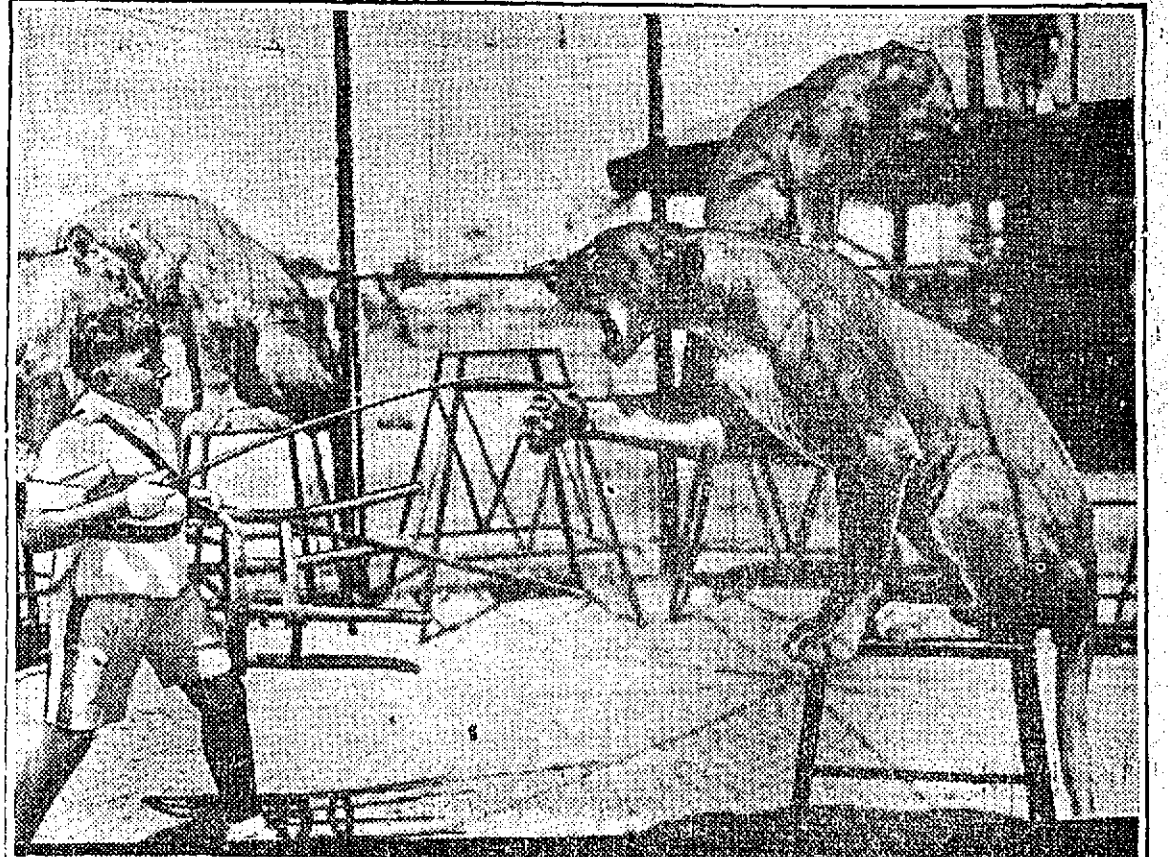

A nation aroused to its peril is swinging every resource toward battling the wind erosion that threatens to make a desert of the vast fertile area shown in this map. Out of the western edge of this zone have swept the terrible dust storms that have caused untold damage, stripping thousands of acres of rich topsoil.

Hamilton Back Behind Bars

The man hunt that has stretched across four states for months ended, Raymond Hamilton, a million-dollar Texas outlaw, once more is behind the bars, again to be confined in the death house at Huntsville, Tex., state prison, from which penitentiary he escaped last July. Hamilton was captured in a Fort Worth railway yard without a shot being fired.

Every Day Is Circus Day for Only Boy Lion Trainer

Circus time is here again and thousands of youngsters are looking forward eagerly to the greatest day in the year. But every day is circus day to Manuel King, 11-year-old Brownsville, Tex., lad, the only boy lion tamer in the world. Manuel is shown in the picture above—85 pounds of boy pitted against a 250-pound lion—as he puts one of his snarling pets through its paces, while three other beasts wait in the background for their turn in the center of the cage at training quarters. Just to show that he's a good pal as well as the mentor of his ferocious charges, Manuel poses at the right with one of his lions, in chummy attitude.

Marries Twice to Be Citizen

Helga Moray is determined to safeguard her American citizenship no matter how many wedding ceremonies it takes. The former British film actress, above, now in Hollywood, married Director Tay Garnett on shipboard four months ago, then "eloped" with him to Yuma, Ariz., for a second ceremony, to clarify the citizenship records.

Waits 54 Years for Polar Honor

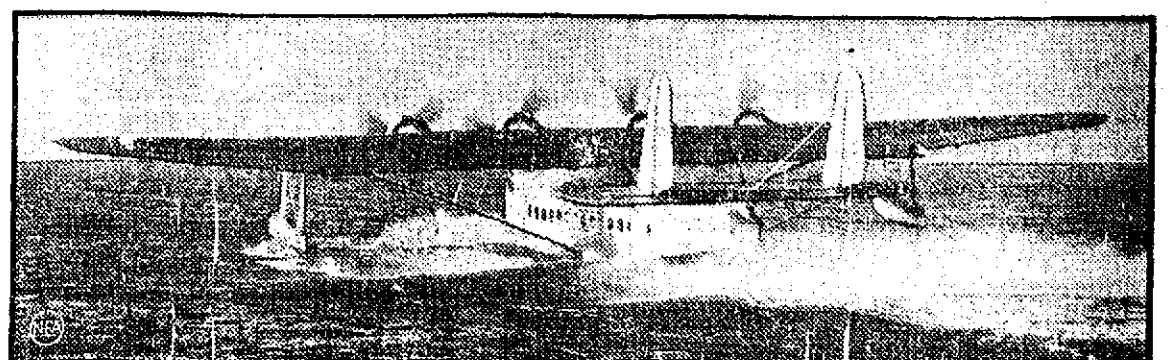

Reward came to Maj.-Gen. Adolphus W. Greeley after 54 years for leading America's first polar expedition, when he was voted the congressional medal of honor for his exploit. Greeley, shown here after learning of the honor, will receive the medal on March 27, his 91st birthday.

Gasoline Taxes Cost Public More Than \$730,000,000 Annually

Map shows total rate of state and federal taxes on gasoline paid by motorists in each state. State taxes range from 2c to 7c per gallon, and cost over \$560,000,000 a year. Federal gasoline taxes, due to expire June 30, 1935, are 1c a gallon and cost \$170,000,000 a year.

Pacific Trail Blazer Lifts Her Wings for Conquest

Slithering through the waters of San Francisco bay, the giant Pan American Clipper takes off, caught by the camera a few moments before it soared into the air on the route which it is blazing across the Pacific to China, 8500 miles away.

New Crisis Faces Hitler on Birthday

Another Test for Dictator Who Spraying to Power on Crises

By the Associated Press

On the eve of his 46th birthday Friday Adolf Hitler faces another of those crises on which he has rocketed to power.

While loyal Nazis throughout the Reich acclaim him, the Reichsfuehrer plunges deep into deliberation over the answer he is to make to the League of Nations' condemnation of his disregard of the Versailles treaty.

He stands out Friday as the pattern of a paradox—but he will be hailed on his birthday throughout Germany.

Must Leave Rhine Alone

BERLIN, Germany. — (P) — Great Britain and Italy, it was revealed Thursday night, have warned Germany she must let the demilitarized Rhineland alone.

Ambassadors of the two powers Wednesday presented their joint Stresa decision to maintain the status quo in the Rhineland, and Germany met that with "sizzling" diplomatic protest to Great Britain against League of Nations censure of the Reich's rearmament.

Nevertheless, Nazi officials were in-

TRUSSES, ELASTIC KNEE CAPS AND ANKLETS

Our stock is all new and of the very latest and improved merchandise. We fit children as well as grown-ups. For many years we have sold this line of goods and now is quite an important department in our store. This stock is carried in a separate room where our fitters can serve you without interruption. We make no charge for fitting and our prices will please you.

Served "Time" for Another, Forgives

War Veteran, Victim of Justice's Error, Pleads for Other Man

CROWN POINT, Ind.—(P)—Ralph E. Harwood, 24, a Hammond furniture salesman, stood before Judge William J. Murray Thursday and heard the facts of his crime redited.

Four years ago Harwood donned a mask, secured a gun and went out for some "easy money." He robbed a grocery store. Subsequently the police arrested Edward Singleton, then 30, a World War veteran, living in Hammond. The victims of the robbery identified Singleton as the bandit. Their identification was positive, despite evidence that the robber was masked. Singleton was sentenced to 10 years in the penitentiary.

A little less than a month ago Harwood's conscience got the better of him, and he confessed to the crime. Singleton, after four years in prison for a crime of which he was innocent, was released.

Thursday Judge Murray was about to pronounce sentence on Harwood when a man stepped before the bench. It was Singleton.

"Your honor," he said, "this young man isn't a real criminal. He has 'gone straight' since that robbery four years ago. I served four years in prison for that crime. Let that be enough. I bear no grudge against young Harwood. I am pleading that you show leniency."

Judge Murray paused a minute, then replied:

"If the man who suffered for the crime this boy committed is big enough to appear in his behalf, I am big enough to grant his request. The sentence is suspended and Harwood will be put on probation."

Stars May Never

(Continued from Page One)

the conversion of all matter into heat energy.

"Is there any way back from radiant energy to matter? As a matter of fact, there is."

"Radiant energy," he said, "exists in the form of definite units—called photons. In certain collisions of one of these photons with an atomic nucleus, the photon becomes a pair of charged particles.

"If it were not for the fact that we have to borrow the assistance of high energy atoms, which are hard to secure in any large amounts in nature, this process (change of a photon into two particles) would constitute a very suggestive one for the reversion of radiant heat energy into matter.

"If we could see ways in which many photons could co-operate to produce particles, the path back to matter would be easier."

County Allotment

(Continued from Page One)

gricultural adjustment administration official in Washington.

"A sufficient portion of the state allotment was prorated to the counties to permit a 5 per cent increase in county allotments this year as compared to 1934 for each county in which the production for a year or years was not omitted in 1934," Field said.

The allotment of tax-exempt cotton by pounds in the counties included:

County—Tax-Exempt Quotas

Hempstead 6,513,182
Howard 3,043,519
LaFayette 5,823,366
Miller 6,699,553
Columbia 8,596,322
Nevada 1,125,513

There are no land areas lower than 3340 feet above sea level in Colorado.

Germany to Open

(Continued from Page One)

The Graf Zeppelin

Her record is, to date, unsurpassed. She has never had a serious accident. The original gas-bags for the storage of Hydrogen are still in shape and she has still about 80 per cent of her original covering. She has flown nearly a half million miles, carried over 17,500 passengers and 53 tons of freight and mails. In 1929 she made her world-famous flight around the globe, covering 21,000 miles in 310 flying hours and, including necessary stops, doing the whole trip in 29 1/2 days. She flew from Friedrichshafen dur case and over the wastes of Siberia to Tokyo, thence across the Pacific to Los Angeles, to New York and back home. She took a trip to the North Pole and has crossed the Atlantic more than 48 times.

Last year she was employed in a regular service between Friedrichshafen and Rio de Janeiro, Brazil. She left respectively from the German and Brazilian cities every fortnight. Her schedule was maintained as regularly as an ocean steamer. She is starting her regular 1935 service on this route this month.

Encouraged by this success and helped by a German government loan on which no interest is required to be paid, the Luftschiffbau Zeppelin now has rapidly nearing completion the great LZ-129. She is destined for a regular service between Germany and New York and is expected to be as steady as has been the "Graf Zeppelin." Construction on this ship was started in February, 1932, and it is hoped to have her ready for test flights late this summer. Her huge middle ring towers 134 feet. There are 15 main rings and 32 auxiliary ones, forming 16 compartments for as many gas bags. She will measure 145 feet from gondola to shell top and will be 212 feet long. Her capacity will be 7,070,000 cubic feet. Her framework girders are of duraluminum. Her covering is treated with aluminum powder, or to ward off the effect of sun rays.

To Use Hydrogen

It is probable that her gas bags will be filled with hydrogen, but it is hoped that the Zeppelin will be able to obtain helium gas from the United States. The advantage of helium is that it is not inflammable and explosive. But it is claimed that even with hydrogen the danger of accident is obviated by the fireproof construction of the ship. The engines, as in the "Graf Zeppelin," are hung on the outside of the ship. Additional safety is gained by providing the gas cells with valves. If helium is obtained, it will be used to inflate the outer cells and only the inner ones will have hydrogen. The fuel load will be 130,000 pounds. Her Diesel engines will be operated on crude oil, which is an additional safety factor. Her engine power will total 4400 horsepower. She is expected to travel 8000 miles without refueling and to maintain a cruising speed of 80 miles per hour.

In addition to her crew of 35, she will carry 50 passengers and 10 tons of paid freight and mails. It is expected that in her Atlantic service she will go to New York in from 90 to 95 hours and on her return journey will take from 40 to 42 hours, having the prevailing winds in her favor then. She will have two large groups of parlors for paying passengers, including two glass-enclosed promenades decks and 25 staterooms each with two beds. A new feature will be the provision of a smoking room, something that was forbidden on the "Graf Zeppelin." The passenger rooms are built inside the ship in two decks one above the other.

Rumors of Dutch

At various times there have been rumors that Holland was contemplating an airship service between Amsterdam and the Dutch East Indies and that Japan was planning one for service from Manchukuo to Japan and thence either to the United States or Australia. In both cases it was said the ships would be built by the Friedrichshafen firm. Inquiry at the London Embassies revealed that, so far, these plans have not been carried out.

It had also been stated that Russia was contemplating an airship commercial service between Moscow and the frontier of Siberia, perhaps even on to Vladivostok. But so far nothing has come of it. The Russians are still experimenting, however.

Russia's first attempts in airship building extended from 1920 to 1925. These were small ones and of the "soft" type. Serious construction of airships really began at the same time as the inauguration of the famous five-year industrial plan. And here an Italian came into the picture. Umberto Nobile, who is now 50, at 35 was constructor of the semi-rigid type of dirigibles. In 1919 he became director of the Military airship factory at Rome and was promoted to general in 1926. He took part in Amundsen's airship trip to the Pole in that year. In 1928 he led the famous expedition of the airship "Italia" to the North Pole. It was lost on the home journey and destroyed. A commission of inquiry in 1929 held him responsible. He resigned his commission and in 1932 went to Moscow, where he became head of aviation construction.

Russian Airships

Before that, workers in factories in Moscow and the newspaper "Pravda," gathered a fund of 21,000,000 rubles for the gift of an airship to the nation. So in August, 1930, Russia had the dirigible "Komsomolskaya Pravda" with a capacity of 2500 cubic meters. In 1932 three new dirigibles were completed—the B-1 with 2200 cubic meters; the B-2 with 5000 cubic meters; and the B-3 with 5000 cubic meters. All these were of the "soft" type.

In May, 1933, there was completed the first semirigid dirigible, B-5 with 2150 cubic meters capacity. They are now at work building a semi-rigid dirigible with 18,500 cubic meters capacity and specialists have designed one to have 50,000 cubic meters. The B-3 has made successful flights from Moscow to Sviyansk and back and Kazan and back. The B-1 flew from Sviyansk to Sebastopol and then on to Moscow. It also made several trips over the Black Sea. They have thus demonstrated their capacity to carry passengers and cargo successfully, but the government has not yet decided to inaugurate any regular commercial service.

Death Notes Read in Bremer Trial

Victim's Father Collapses in Kidnaping Trial at St. Paul

ST. PAUL, Minn.—(P)—The death-threatening ransom notes which demanded payment of twice as much as the \$200,000 finally yielded for his release were introduced Thursday in the trial of 10 alleged conspirators in the Edward G. Bremer abduction.

Just before their introduction, Adolph Bremer Sr., father of the victim, had told of receiving them and in broken tones of his anguish on his son's return from his 21-day captivity.

The elder Bremer wept freely and on several occasions the court ordered a delay until he had regained his composure. He was near "collapse" during his son's detention.

Running through the ransom notes were repeated demands that "the copers must be pulled off." One, delivered after Adolph Bremer had requested a 2-hour period to negotiate with the abductors without police interference, advised the kidnapped man would be returned "stiff" if police did not withdraw.

The same note said the "price" would be raised to \$500,000 if demands for the \$200,000 ransom were not met promptly. Earlier testimony had also told that Bremer was threatened with death when he was abducted.

Walter Magee, St. Paul contractor and friend of the Bremer family, who acted as intermediary and pay-off man, followed Adolph Bremer to the stand. He testified that a time lock blocked one plan for payment of the ransom.

An apparent attempt at trickery in connection with ransom negotiations was related by the day's first witness, Arthur Murray, whose parents operate a bus depot at Paribault, Minn. He said a package and a letter were left at the depot to be called for. This was while Bremer was held. After his release the package, still unopened, was opened and found to contain corn meal. Contents of the letter were not brought out in court.

It is a 60,466,175 to 1 chance that you can turn up a seven on the dice 10 times in succession.

Brown Study

Coats of tan will be good this spring, judging by the sun-browned complexion and warm smile that President Roosevelt brought back to Washington after his tropic fishing expedition off Florida.

In Sarcoma, a girl is given her brother's name if she is born after his death, and a boy is given his sister's name under similar circumstances.

Back-Seat Drivers

Judge—"Who was driving when you hit that car?"

Marine (triumphantly, about three sheets in the wind)—"None of us, judge; we was all sitting in the back seat."—U. S. S. Pennsylvania Key-stone.

One of the most daring pirates of the Spanish Main was a woman, Mary Read. More than one man fell before her sword and pistol. She was condemned to hang, but died in prison.

It is estimated that Royal Air Force machines flew approximately 47,000,000 miles in 1934, and every 12,000 hours flying was attended by a fatal accident. This is a new low mark.

ARE YOU FEELING SLUGGISH?

Take Thedford's Black-Draught for constipation. What relief! That fresh feeling, that sparkle to the eyes, keen zest for work or a lively good time! There's nothing better than a clean system for health.

Mr. J. M. Cosper, of Benton, La., writes that when he gets up in the morning "feeling dull, tired, drowsy and all out of fix, with a bad taste in my mouth, I know I need something to clear me up. Black-Draught certainly does clear my system and make me feel fine."

It is purely vegetable, not costly.
